Work Experience

Misraj Technology

Full Stack Developer | Jul 2024 – Dec 2024

- Integrated custom AI models with modern full stack tools.
- Delivered major updates to three legacy codebases (Nest.js, Next.js, and React.js) within the first month.
- Handled large-scale data operations (seeding, manipulation, search).
- Shipped new features based on clients needs.
- Tech:** AWS, ElasticSearch, FusionAuth, BunnyCDN, GPT-4o-mini, WhisperAI

MySlide

Web Developer | Mar 2023 – Aug 2023

- Developed lightning fast landing pages using **Astro**.
- Managed integrations with **Cloudflare Pages**, **Storyblok**, and **EmailJS**.
- Ensured SEO performance and mobile-first design best practices.
- Maintained third-party platform connections and optimized page delivery.

EcoMundo

React Developer | Dec 2022 – Jun 2023

- Migrated legacy **Ext.js** codebase to optimized modern **React**.
- Maintained a custom internal React component library.
- Actively contributed to UI architecture and module design decisions.
- Tech:** MUI, Web Components, private npm packages

IT-Land Technologies

React Developer | Jun 2022 – Nov 2022

- Maintained and extended two automation-focused legacy apps, including one for **stem cell** operations and one for **call evaluation**.
- Built a hospital scheduling feature with interactive **drag-and-drop** support.
- Developed a full-stack video call system integrated with an in-house mobile app.
- Tech:** Docker, CI/CD, Health-focused stack
